

Have a go before discussing how to do it.

## Interpreting pictograms 1

### Discover

crab

razor shell

sea snail

starfish

shrimp

Each ● represents 1 creature.

Creature	Number of creatures
	● ● ● ●
	● ● ● ● ● ● ● ●
	● ● ● ● ● ●
	● ●
	● ● ● ● ● ● ● ● ● ●

- 1 a) Some children make a pictogram to show how many creatures they have found.

The labels are missing from the pictogram.

Work out where each label should go.

- b) Which creature did the children find the most of?

Talk through how to work out the answers.

## Share

a) First we count how many of each creature there are.

Creature	Tally
crab 	
sea snail 	
shrimp 	
razor shell 	
starfish 	

Then we complete the pictogram.

Each ● represents one creature.

Creature	Number of creatures
crab 	● ● ● ●
sea snail 	● ● ● ● ● ● ● ●
shrimp 	● ● ● ● ● ●
razor shell 	● ●
starfish 	● ● ● ● ● ● ● ● ● ●

b) There were 10 .

The creature the children found most of was .

Apply these methods to the following questions. Keep discussing.

## Think together

- 1 Which creature did the children find the least of?

Creature	Number of creatures
crab 	
sea snail 	
shrimp 	
razor shell 	
starfish 	

The creature the children found the least of was \_\_\_\_\_.

- 2 How many fewer  are there than ?

$$\square - \square = \square$$

There are  $\square$  fewer .

- 3 Complete the sentences.

There are  $\square$  more  than .

There are 2 fewer \_\_\_\_\_ than .

Add in additional questions if needed then go on to the challenge below.

- 4 Four more  were seen on the beach.  
Some more  were also seen.  
There is now the same amount of both.  
How many more  were seen?

I am going to work out how many  there are now.

I drew this bar model to help me.

shrimps

6

4

razor shells

2

more  were seen.
