

Nature Craft Easter Eggs

Outdoor Activity

You will need:

Eggs

Sand, flowers, leaves, seeds, grass, soil, weeds, small sticks (anything you would like to stick on your eggs)

Strong glue

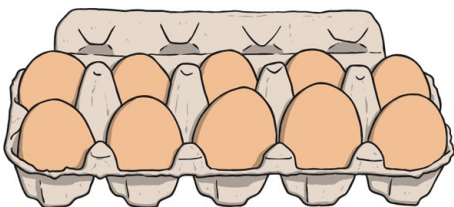

Containers

Glue sticks/brushes

Cardboard tubes cut into small sections

The activity

1. To start with, blow the eggs you are going to use. To blow the eggs, you need to use a sewing needle or pin to make a hole (about double the size of the needle/pin head) in the top and the bottom of every egg. Then, in a cup gently blow through one hole so the yolk comes out the other end of the egg. Carefully rinse the inside of the egg with water.
2. Children choose what they are going to use to decorate their egg, then collect from the outdoor area.
3. Stand the eggs on the cut-up tubes, to keep them steady whilst the children decorate them.
4. Using the glue, the children stick their natural materials onto the eggs, being careful not to damage them!
5. If using fine resources such as soil, the children could cover the egg in glue then roll the egg in the soil.
6. Leave to dry on top of the tubes.
