

Computing Overview

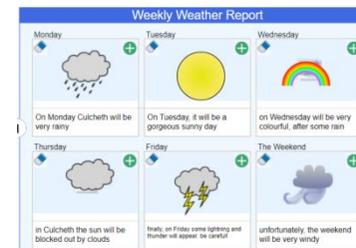

This document shows the Early Learning Goals and National Curriculum coverage for Computing. It highlights which aspect of the National Curriculum is to be planned for. At Twiss Green we follow the Purple Mash Scheme- which has been tailored to the schools needs and timetable requirements. The three main areas are- Computer Science, Information Technology and Digital Literacy (Online Safety)

This is the starting point for the planning of a sequence learning in each area. The placement of each objective has been carefully planned to allow for clear progression of knowledge, skills, techniques. A structure of MAIN, SUPPORTING and REVISITING units have been included to ensure that key skills are regularly revisited.

This document should be used alongside the individual Subject Knowledge Progression Map. Here the links to previous knowledge, specific knowledge, skills, vocabulary and any links to planning resources are highlighted. Finally, teachers should refer to the Purple Mash planning document for lesson ideas.

This is not a working document and should not be changed or altered without discussion with the Computing Lead.

Abbreviations

ELG	EYFS Early Learning Goals
NC	National Curriculum
Main	The main focus of the terms teaching- introducing new and building on current skills and knowledge: this unit must be taught.
Supporting	Complimentary unit to further develop learning from the Main unit- if time allows the unit can be covered to give more practice of skills taught
Revisiting	Aspects of these units should be taught as a way of revisiting previous learning

ONLINE SAFETY WILL BE REVISITED AT THE START OF EVERY UNIT						
YEAR 1	Main Online Safety- Unit 1.1 NC- Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies. Technology outside school- Unit 1.9 NC- Recognise common uses of information technology beyond school		Main Coding- Unit 1.7 NC- Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions. NC- Create and debug simple programs NC- Use logical reasoning to predict the behaviour of simple programs. NC- Use technology purposefully to create, organise, store, manipulate and retrieve digital content		Main Pictograms- Unit 1.3 NC- Use technology purposefully to create, organise, store, manipulate and retrieve digital content	
			Supporting Maze Explorers- Unit 1.5 NC- Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions. NC- Create and debug simple programs NC- Use logical reasoning to predict the behaviour of simple programs		Supporting Spreadsheets- Unit 1.8 NC- Use technology purposefully to create, organise, store, manipulate and retrieve digital content
